DECORATING METHODS

To accentuate your “customized” product, select a decorating method to enhance your logo. Refer to the catalog listing under each product for recommended imprint options conducive to each type of leather.

Blind Deboss
This classic method leaves a deep impression of your logo onto the leather surface. A magnesium die is heat pressed into the leather.

Foil Deboss
This stunning method lays one-color of foil onto the surface while using a magnesium die to press your logo into the leather. Metallic Gold, Metallic Silver, Black or Brown.

Color-Filled Emboss
This method creates a bold colorful replication of your logo. Up to six (6) spot colors are applied to the surface of the leather. A die is then used to emboss the logo.

Silk-Screened
This direct screen printing method is available on select products to imprint the logo onto the surface of the leather.

Embroidery
This involves stitching your logo onto the leather. Can be used for a single color or multi-color logo. Available on select products.
